

**Appendix B. Field Program - Letter to landowners**

**THE TREE PROJECT**  
energy • water • air

*The City of Golden and the  
Institute for Environmental Solutions  
need your help!*

May 16, 2007

Dear Friend,

The City of Golden together with the Institute for Environmental Solutions is gathering information about trees and the environmental benefits they provide. This will help Golden and its residents to make better decisions about planting trees and improving our environment.

We would like to survey some of the trees on your property. With your permission, a team of two or three researchers will come to your address in June to collect the information we need. You do not need to be home. It will take the researchers about a half hour. No trees or property will be damaged. If you would like to know more about the project, please go to our website:  
<http://instituteforenvironmentalsolutions.org/treeproject.html>.

We will call you soon to ask permission to study your trees. Please contact us with your questions or comments through our website anytime, or by e:mail to Solutions@I4ES.org.

Thank you for your help!

Carol Lyons  
Executive Director  
Institute for Environmental Solutions

Dave High
