

Brandon A. Singletary

Objective

I am a student at the Colorado School of Public Health with some experience in both research and clinical settings. As a highly driven and diversified individual, I bring a outgoing personality to any situation with the ability to work collaboratively to achieve goals. While I have some experience in psychology I am looking to further my knowledge in both the research and clinical aspects of the health field in order to gain a more complete understanding of health care. While working to acquire more experience, I will continue to pursue a graduate degree and to ultimately attain my doctorate in public health.
