Education

University of Colorado at Boulder *Boulder, Colorado*
Master of Science in Environmental Studies/MBA expected May 2010

Brandeis University *Waltham, Massachusetts*
Master of Software Engineering Spring 2003

Indiana University *Bloomington, Indiana*
Bachelor of Science in Business, Computer Information Systems December 1992

Experience

Sustainable Travel International *Boulder, Colorado*
Summer Intern May 2008 – September 2008

- Designed and led the Tour Operator Carbon Offset Project (TOCOP) to encourage the use of carbon offset to mitigate climate change
- Promoted sustainable travel to commercial tour operators and universities alumni travel programs
- Analyzed and documented TOCOP result as benchmark for future projects

Cisco Systems Inc. *Boxborough, Massachusetts*
Software Engineer October 2000 – June 2007

- Worked in the Caching Services Engineering Business Unit which has delivered multiple releases of File Services applications
- Led teams in research, prototype, design, development, testing, deployment and support of various modules of the applications
- Experience working with geographically dispersed teams. Trained engineers in Israel, India and San Jose, US
- Acted as a collaborator to engage Marketing and Sales teams in reviewing customer requirements and product competitiveness
- Received 3 outstanding achievement awards

Revelwood Inc. *New York City, New York*
Senior Software Developer April 1999 - August 2000

- Re-engineered and managed the development of SmartSite, a platform for creating and deploying web pages that display real-time On Line Analytical Processing (OLAP) data
- Introduced the use of Object Oriented Design and Analysis (UML) to the project; established coding standard, style and convention
- Researched and studied new technologies, processes and products to guide technical directions

FedEx *Memphis, Tennessee*
Technical Advisor February 1999 - March 1999
Senior Programmer Analyst January 1998 - February 1999
Programmer Analyst (Contracted by SCB Computer Technology Inc.) April 1997 - January 1998

- Designed and developed Java Enterprise Telemarketing System (JET), an internationalized object oriented framework for developing client/server telemarketing campaigns
- Monitored production systems and supported a call center of 150 representatives plus 30 staff members
- Led a team of five programmers in developing fast cycle telemarketing campaigns which generated \$175 in revenue for each completed customer contact. Re-engineered the Business Bonus Campaign which generated \$11 million incremental annual revenue in 1998
- Received 5 outstanding performance awards

Electronic Data Systems Corporation, Indiana Title XIX Account
Systems Engineer

Indianapolis, Indiana
June 1996 - February 1997

- Enhanced and maintained the Medicare AIM system for the State of Indiana

Wolfe & Swickard Machine Co., Inc.
Systems Analyst

Indianapolis, Indiana
April 1993 - June 1996

- Developed Windows applications, built an audit system to analyze productivity using statistical process control and mathematical modeling
- Participated in MIS strategy planning, created system documents, and provided end user training
- Responsible for hardware, software and network troubleshooting
