

Dennis Creamer

Manager, Stakeholder and Legislative Affairs
Suncor Energy U.S.A.

Professional Degrees:

Chemistry
MBA

Work Experience; I worked all my professional life in the Petroleum Industry, working for Conoco and Conoco Phillips for 35 years and I have worked for my current employer, Suncor Energy U.S.A., for over 2 years. I have worked in Oklahoma, Louisiana and Colorado. Most of my career has been spent on environmental, regulatory and community issues. The past 10 years or so I have spent directly working with local communities for our operations in Colorado.

During this time I have had the opportunity to start-up a non profit organization, the Northeast Metro Pollution Prevention Alliance (NEMPPA) that has worked directly in communities and small businesses in northeast Denver on diesel emission and energy efficiency projects funded by EPA and the StEPP foundation. I am currently President of NEMPPA.

I am currently President of the Colorado Environmental Partnership. CEP is comprised mostly of larger corporations whose objective it is to support collaboration among its members and others on environmental issues in Colorado.

I also participate on the Board of the Colorado Alliance for Environmental Education (CAEE), am a current member of the Governor-appointed Petroleum Storage Tank Committee and Pollution Prevention Advisory Board. I also was a past member of the Air Quality Control Commission and Regional Air Quality Council.

Professional Interest ; My greatest interest is in bringing groups of similar interest in the environment, sustainability and energy efficiency together to work on common objectives.

Leisure Activities; cross country skiing, running, climbing, reading, woodworking
