Project Manager/ Research Analyst

Professional Summary

Skilled project manager and research analyst experienced in multidiscipline, multi-domain research and analysis for federal government and DoD agencies. Extensive project management experience involving multiple team members, multiple stakeholders, and multiple disciplines. Adept in providing concise, contextually relevant results and in identifying analytic and data collection solutions to fill gaps in knowledge bases and understanding. Experienced in identifying information needs and dependencies, and ramifications and implications. Experienced in managing training projects, developing training content, and performing hands-on training.

Select Career Achievements

- Authored/coauthored numerous analytic reports on national security problems
- Coauthored technical data collection guides
- Coauthored test and evaluation facility handbooks
- Managed and coauthored test and evaluation facility training course content and delivery
- Won competitive bids for development of technical analytic training courses
- Developed web-based maritime multidiscipline knowledge repository

Areas of Expertise

- **Project Management:** Proficient in planning, staffing, budgeting, teaming, execution, and delivery.
- **Research and Analysis:** Contextual, relevant, multidisciplinary, multi-domain research and analysis across dispersed geographic regions; recognition of information gaps and solutions; intentions and ramifications; understanding the “observer effect”; collection planning; and alternative analysis. Proponent of the importance of data and information provenance and context.
- **Personnel Management:** Managed local and geographically dispersed, multifunctional teams.
- **Business Development:** Proficient in all phases of business development: identifying customers, writing white papers and proposals, project planning, delivery, and follow-on.
- **Leadership:** Skilled in leading diverse, cross-functional, geographically dispersed teams to deliver superior, relevant analytic products: customer focused, revenue focused, staff focused.
- **Communication Skills:** Effective written and verbal communicator; engages with customers, stakeholders, and staff to ensure project success.
