experience

Colorado Energy Office [Manager, Policy & Regulatory Affairs] 2015 – present

- Managed the Colorado Energy Office’s engagement in regulatory proceedings related to energy policy at the Colorado Public Utilities Commission (PUC):
 - Researched a diverse range of topics in order to develop regulatory strategies and draft expert testimony, policy briefs, and other filings
 - Participated in settlement negotiations to build consensus on topics such as grid modernization, renewable energy, energy efficiency, resource planning, utility rate design, and low-income equity
 - Streamlined and standardized internal regulatory processes
- Built and maintained relationships with a variety of stakeholders with diverse interests, including state agencies, local governments, private entities, and nonprofit organizations
- Researched, developed and managed contracts for innovative new projects aimed at advancing markets for renewable energy resources in Colorado, with a focus on solar and waste heat to power
- Served on the Colorado Department of Health and Environment's Pollution Prevention Advisory Board Assistance Committee, guiding, evaluating and overseeing waste diversion grant projects

CLEAResult [Program Coordinator] 2014 – 2015

- Managed rebate application processing, support and quality control for Xcel Energy’s Small Business Lighting program
- Developed and maintained relationships with utility client, partners, customers and contractors
- Monitored and analyzed performance metrics, providing weekly reports to client
- Identified inefficiencies and integrated process improvements to performance metrics tracking, application management and weekly reporting

Richard Heath & Associates, Inc. [Research & Regulatory Analyst] 2013 – 2014

- Developed and managed energy-related research studies to inform strategic planning and program design
- Monitored, analyzed and communicated regulatory and policy developments, relevant research and key energy industry trends
- Provided writing, editing and research support for the production of proposals, reports and marketing collateral
- Created, researched, and performed quantitative analyses for innovative new energy and water efficiency program concepts
- Led a cross-departmental group in the development and implementation of a corporate digital media marketing strategy, increasing social engagement by over 1300%

A1 Solar Power [Project Manager] 2012 – 2013

- Coordinated end-to-end residential solar projects, including site inspections, financing, system design and engineering, permitting and installation
- Designed and implemented administrative and operational procedures for new branch office
- Recruited, trained and supervised administrative support staff

City of Chula Vista [Conservation Specialist] 2011 – 2012

- Engaged in development and implementation of outreach strategies for water and energy efficiency programs
- Established and maintained relationships with partner organizations including utilities, nonprofits, public agencies and businesses
- Served as community liaison for energy efficiency home tours and citywide sustainability events
- Performed energy and water efficiency audits for commercial businesses
